Experience what aphasia is like

Quick facts about what it’s like to live with aphasia

● Aphasia is an acquired communication impairment that can affect talking, understanding speech, reading, and writing.
● For many people it is a chronic problem that affects every area of life.
● People with aphasia often are misunderstood by others, who may:
  ○ Think they are mentally impaired or drunk.
  ○ Walk away or hang up on them.
  ○ Treat them like a child.
  ○ Avoid talking to them.

Why experience aphasia for yourself?

● While we can’t really know what it’s like to have aphasia, we can get a sense of it.
● It can be easy to get frustrated when someone can’t communicate, especially if it’s someone you see often. Gaining a little more insight may help with the overall situation.

How can you experience aphasia?
